

TOOBA SHAIKH

Software Engineering Student | Full-Stack & AI Engineering
Karachi, Pakistan | toobashaikh2803@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

Software Engineering student (CGPA 3.79/4.0) with hands-on experience building and deploying full-stack production applications using Java, Spring Boot, MongoDB, React, and Node.js. Delivered three live platforms used by real end-users, led a 4-member team through full SDLC, and applies a strong DSA and data-analytics foundation to build measurable, scalable solutions. Completed an AI internship building LLM-powered chatbots and RAG pipelines. Seeking a full-stack or AI engineering internship.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, C, JavaScript
- **Backend:** Spring Boot, Node.js, REST API Design, JWT Authentication, OOP & Design Patterns
- **Frontend:** React, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Databases:** MongoDB, MySQL
- **AI/Data:** LLM APIs & Prompt Engineering, RAG fundamentals, Data Analysis & Visualization, Excel, Tableau
- **Tools & DevOps:** Git/GitHub, Docker, Postman, IntelliJ IDEA, VS Code
- **CS Fundamentals:** Data Structures & Algorithms, System Design, MVC / REST / Client-Server Architecture

PROJECTS

EduEvent — Educational Event Management Platform [\[Live Demo\]](#)

Spring Boot, Java, MongoDB Atlas, REST API, Docker, JWT — deployed on Render

- Architected and shipped a multi-role (Admin/User/Judge) full-stack platform for event registration, quiz proctoring, and hackathon team management, now in live production use for real IEEE events.
- Built a live face-detection and eye-gaze monitoring system for quiz proctoring, automatically invalidating sessions on presence violations.
- Automated end-to-end certificate generation on quiz completion, eliminating manual issuance for verified participants; led a 4-member team through full SDLC using Docker and Git.

SmartInvest — Stock Market Simulator [\[Live Demo\]](#)

React, Node.js, MongoDB, REST APIs, Chart.js

- Engineered a full-stack stock trading simulator with auto-updating market prices, real-time portfolio tracking, and a Chart.js analytics dashboard for net-worth and transaction history.
- Extended the platform with a net-worth leaderboard and Learning Hub module, secured end-to-end with JWT auth and a persistent MongoDB transaction system.

Splitly — Smart Expense Splitter [\[Live Demo\]](#) [\[GitHub\]](#)

React, Vite, Tailwind CSS, Node.js, Express, MongoDB Atlas, JWT, Gemini API — deployed on Vercel

- Built a full-stack expense splitter: per-item bill splitting with proportional tax, JWT auth, 25+ REST endpoints and AI receipt scanning.
- Designed a pending-to-cleared settlement flow and a greedy debt-simplification algorithm, plus budgets and a Recharts dashboard.

Bus Path Navigator — Shortest-Path Route Engine

Spring Boot, Java, MongoDB, DSA (Graph Algorithms)

- Implemented Dijkstra and BFS graph algorithms in a Spring Boot backend to compute optimal bus routes across a city-wide stop network.
- Designed efficient route-mapping data structures optimized for query performance; won 1st Place at the university Project Exhibition.

EXPERIENCE & LEADERSHIP

AI Intern — AI Rahim Group of Companies (Aug 2026 – Sep 2026)

- Built AI/LLM-powered features including conversational chatbots and Retrieval-Augmented Generation (RAG) pipelines during a 2-month hands-on AI internship.
- Worked with LLM APIs and prompt engineering to design context-aware responses, applying RAG techniques to ground model outputs in domain-specific data.

Chairperson — IEEE SSUET Student Branch (2025 – Present)

- Organized 30+ workshops, seminars, and hackathons on software development and emerging technologies, drawing 75+ attendees at peak events.
- Led strategic planning for a 50+ member technical community and built partnerships with IEEE regional bodies and industry professionals for career-exposure programs.

Student Branch Relations Coordinator — IEEE Karachi Section SAC (2026)

- Selected as liaison between IEEE Karachi Section and university student branches; coordinate cross-branch communication on student-led technical initiatives Section-wide.

EDUCATION

BS Software Engineering — Sir Syed University of Engineering & Technology Oct 2024 – Present

CGPA: 3.79 / 4.0

CERTIFICATIONS

Full Stack Web Development (UIT University) • Introduction to Generative AI (Google Cloud, Coursera) • Introduction to Data Analysis using Microsoft Excel (Coursera Project Network) • Ask Questions to Make Data-Driven Decisions (Google, Coursera) • Foundations: Data, Data, Everywhere (Google, Coursera)
